

Front End Software Developer

Name: Michael Gbanya

Phone: 040-9749-747

Email: gbanyamichael1@gmail.com

Australian work rights: Permanent resident

Portfolio: <https://michaelgbanya.netlify.app/>

Summary:

When I write code, I usually have three questions that guide me:

1. What is the purpose of the project?
2. What is the goal of the product owner?
3. If I am a user of this product, would I be satisfied with the experience or there should be more improvement?

These questions guide me in creating products tailored to suit both users and product owners.

I am dedicated to writing code that promotes businesses and improve user experience and satisfaction using modern technologies .

The tech industry is constantly evolving, it is my passion to always stay updated about latest industry changes that help promote development in organizations and in turn improve my skills constantly. To achieve this, I am constantly learning new skills and languages that helps me blend easily in development environments.

I focus on frontend development because I am detail oriented and concerned about delivering perfect products to users.

Skills:

JavaScript, React, TypeScript, HTML, CSS, TailwindCSS, SASS, node, GraphQL, Database Schema, AWS, Git and Figma. (Currently learning to master Python)

Education and Training

- Full Stack Software Development | Codehance UK | 2022 |
- Master of Business Administration | University of Perpetual Help System DALTA – Laspinas | Philippines | 2023 |
- Bachelor of Science in Marine Transportation | University of Perpetual Help System DALTA – Laspinas | Philippines | 2014 – 2019 |

Project Experience:

bookerBuddy (Online Marketplace for the Beauty and Lifestyle Industry)

Appointment Booking E-commerce Software: An online marketplace that empowers businesses to open and manage appointments, teams, and services.

User-Friendly E-commerce Interface: I designed a user-friendly interface for customers to easily search and book appointments with service providers.

Content Management System: I developed a content management system for businesses, enabling them to efficiently manage their profiles, services, customers, and bookings within the platform.

Location-Based and Keyword Search: I integrated Google's Geo-location API, allowing users to discover and book services through location-based searches, keywords, or specific categories.

Technologies Used:

React: I utilized React framework to create a responsive and interactive user interface.

JavaScript: JavaScript was used for dynamic content rendering and client-side interactivity, ensuring a smooth and engaging user experience.

CSS and TailwindCSS: Designed the layout and UI using CSS and TailwindCSS.

Security and Payment in the E-commerce Marketplace:

Secure Payment Gateway: Integrated a secure payment gateway for e-commerce transactions within the marketplace, ensuring encrypted and safe online transactions for customers, building trust and confidence in the e-commerce and marketplace environment.

Job-Plus (Job Site Search Engine)

I built a job site search engine by gathering a list of job websites and creating a database of job postings from these websites. I then developed a search interface that allows users to input their desired job title, location, and other relevant information to search for job postings that match their criteria.

The search engine also includes filters and sorting options to further refine the search results. Finally, I implemented a system to regularly update the database with new job postings to ensure that the search results are always up to date.

Built the frontend and backend using JavaScript.

Utilized TailwindCSS, MaterialUI, SASS, Flexbox, and Grid for styling and layout.

Created a user registration and login system using JWT authentication.

Work History:

Codehance UK | Full-Stack Developer | 2022 - Present

- Building responsive and aesthetic websites using latest technologies and tools such as React, JavaScript, CSS, SASS, vite, npm, yarn and TailwindCSS Framework.
- Design and build databases utilizing tools such as Strapi, Postman, and SQLite.
- Design page layouts with Figma.
- API integration.
- Hosting websites for optimal performance.

Administrator Support | Go-Pak UK | 2023 |

Shift Manager | The MSG Group UK | 2023

Additional Skills:

- Fluent in English.
- Excellent written and verbal communication skills.
- Strong teamwork and collaboration skills.
- Agile development methodologies.
